What this means

- 1 **A later replacement.** The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
- 2 **Smaller repairs.** Emergency repairs run about 3.9× the planned rate in a school, and the PaxSeal fee covers half of planned repairs. Together that saves \$1.56M.
- 3 **A predictable budget line.** Emergency repairs become a fixed annual cost the board can plan for, and leaks stop closing classrooms.
- 4 **The program pays for itself.** Each \$1 of fees avoids about \$3.13 of other cash roof costs.

Local risk profile

Prince George's County, MD (24033)

Thunderstorm wind / derecho, snow load

About 3–4 major regional roof-damaging events per 20 years, such as the 2010 snowstorms, the 2012 derecho and the 2016 blizzard. Expected storm damage to this roof over 20 years is **\$40K** if maintained and **\$60K** with reactive repair only, before insurance. A documented maintenance history also helps when an insurer reviews a claim.
