Where the savings come from

20-year totals

	PAXSEAL	REACTIVE	SAVINGS
PaxSeal fees	\$441K	—	-\$441K
Repairs paid by owner	\$300K	\$2.30M	+\$2.00M
Expected storm damage	\$154K	\$231K	+\$77K
Roof replacements	\$2.02M	\$1.76M	-\$260K
Cash spending	\$2.91M	\$4.29M	+\$1.38M
Current roof value used	\$738K	\$738K	—
Roof life left at year 20	-\$615K	-\$164K	+\$451K
Net 20-year cost	\$3.03M	\$4.87M	+\$1.84M

What this means

- 1 A later replacement. The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
- 2 Smaller repairs. Emergency repairs run about 3.9× the planned rate in a school, and the PaxSeal fee covers half of planned repairs. Together that saves \$2.00M.
- 3 A predictable budget line. Emergency repairs become a fixed annual cost the board can plan for, and leaks stop closing classrooms.
- 4 The program pays for itself. Each \$1 of fees avoids about \$4.13 of other cash roof costs.
