Where the savings come from

20-year totals

	PAXSEAL	REACTIVE	SAVINGS
PaxSeal fees	\$231K	—	-\$231K
Repairs paid by owner	\$117K	\$966K	+\$849K
Expected storm damage	\$20K	\$30K	+\$10K
Roof replacements	\$787K	\$688K	-\$99K
Cash spending	\$1.16M	\$1.68M	+\$520K
Current roof value used	\$288K	\$288K	—
Roof life left at year 20	-\$240K	-\$64K	+\$176K
Net 20-year cost	\$1.20M	\$1.91M	+\$710K

What this means

- 1 A later replacement. The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
- 2 Smaller repairs. Emergency repairs run about 4.2× the planned rate in a medical facility, and the PaxSeal fee covers half of planned repairs. Together that saves \$849K.
- 3 Patient care keeps running. A leak in a clinical area triggers infection-control work, closes rooms and can damage equipment.
- 4 The program pays for itself. Each \$1 of fees avoids about \$3.29 of other cash roof costs.

Local risk profile

Prince George's County, MD (24033)

Thunderstorm wind / derecho, snow load

About 3–4 major regional roof-damaging events per 20 years, such as the 2010 snowstorms, the 2012 derecho and the 2016 blizzard. Expected storm damage to this roof over 20 years is \$20K if maintained and \$30K with reactive repair only, before insurance. A documented maintenance history also helps when an insurer reviews a claim.
