MARKET PROJECTION

Typical mixed-use building

Culbertson (N. Virginia) market

October 14, 2026

Planned maintenance is projected to save the owner of a typical Culbertson (N. Virginia) mixed-use building $266K over the next 20 years.

About 32% less than reactive repair: $183K lower spending plus $83K more roof life at year 20. Range $125K–$356K from conservative to upside assumptions; $140K in today's dollars at a 7% discount rate.

What this means

1. **A later replacement.** The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
2. **Smaller repairs.** Emergency repairs run about 3.6× the planned rate in a mixed-use building, and the PaxSeal fee covers half of planned repairs. Together that saves $333K.
3. **Both income streams protected.** A leak can close the ground-floor retail and damage the offices or apartments above.
4. **The program pays for itself.** Each $1 of fees avoids about $2.69 of other cash roof costs.

Local risk profile

Estimates, not a quote. Projections from Culbertson (N. Virginia) market research and industry data, in nominal dollars. The PaxSeal fee is an estimate; your proposal states the actual price. Net cost includes wear on the current roof, less roof life left at year 20; both roof-value figures are in today's dollars. Storm damage is before insurance. Property value is the yearly gain in net operating income divided by the cap rate, for income property where the owner pays for the roof.
