Net 20-year cost	\$1.39M	\$2.27M	+\$882K

What this means

- 1 **A later replacement.** The next new roof moves from year 8 to year 11, when it costs less in today's dollars.
- 2 **Smaller repairs.** Fixes made on scheduled visits avoid emergency work at about 4.2× the cost in a medical facility, saving \$1.01M.
- 3 **Patient care keeps running.** A leak in a clinical area triggers infection-control work, closes rooms and can damage equipment.
- 4 **The program pays for itself.** Each \$1 of fees avoids about \$4.82 of other roof costs.
