

Roof Lifecycle Cost Analysis

Planned maintenance is projected to save the owner of a typical Hampton Roads apartment property **\$356K** over the next 20 years.

That is 33.7% less than fixing problems only after they leak. Under conservative to upside assumptions, the savings range from \$180K to \$468K. In today's dollars the estimate is worth \$186K.

Credit for roof life left	-\$135K	-\$36K	+\$99K
Net 20-year cost	\$701K	\$1.06M	+\$356K

What this means

- 1 **A later replacement.** The next new roof moves from year 8 to year 11, when it costs less in today's dollars.
- 2 **Smaller repairs.** Fixes made on scheduled visits avoid emergency work at about 3.8× the cost in an apartment property, saving \$419K.
- 3 **Fewer unit turns.** A leak into an apartment means displaced residents, mold risk and lost rent. Early repairs keep units occupied.
- 4 **The program pays for itself.** Each \$1 of fees avoids about \$3.82 of other roof costs.

Estimates, not a quote. Projections from Hampton Roads market research and industry data, in nominal dollars. The PaxSeal fee is an estimate; your proposal states the actual price. Property value is the yearly gain in net operating income divided by the cap rate, for income property where the owner pays for the roof.
