

Roof Lifecycle Cost Analysis

Laurel market
October 2, 2026

Planned maintenance is projected to save the owner of a typical Laurel retail center **\$224K** over the next 20 years.

That is 27.4% less than fixing problems only after they leak. Under conservative to upside assumptions, the savings range from \$90K to \$311K. In today's dollars the estimate is worth \$120K.

Credit for roof life left	-\$116K	-\$31K	+\$85K
Net 20-year cost	\$594K	\$818K	+\$224K

What this means

- 1

A later replacement. The next new roof moves from year 8 to year 11, when it costs less in today's dollars.
- 2

Smaller repairs. Fixes made on scheduled visits avoid emergency work at about 3.3× the cost in a retail center, saving \$309K.
- 3

The program pays for itself. Each \$1 of fees avoids about \$2.78 of other roof costs.

Estimates, not a quote. Projections from Laurel market research and industry data, in nominal dollars. The PaxSeal fee is an estimate; your proposal states the actual price. Net cost includes wear on the current roof, less roof life left at year 20. Storm damage is before insurance. Property value is the yearly gain in net operating income divided by the cap rate, for income property where the owner pays for the roof.
