

# Roof Lifecycle Cost Analysis

San Antonio market  
October 2, 2026

Planned maintenance is projected to save the owner of a typical San Antonio medical facility **\$993K** over the next 20 years.

That is 39.4% less than fixing problems only after they leak. Under conservative to upside assumptions, the savings range from \$548K to \$1.27M. In today's dollars the estimate is worth \$511K.

What this means

- 1

**A later replacement.** The next new roof moves from year 8 to year 11, when it costs less in today's dollars.
- 2

**Smaller repairs.** Fixes made on scheduled visits avoid emergency work at about 4.2× the cost in a medical facility, saving \$1.09M.
- 3

**Patient care keeps running.** A leak in a clinical area triggers infection-control work, closes rooms and can damage equipment.
- 4

**The program pays for itself.** Each \$1 of fees avoids about \$5.30 of other roof costs.
