Cash spending	\$1.21M	\$1.76M	+\$550K
Current roof value used	\$288K	\$288K	—
Roof life left at year 20	-\$240K	-\$64K	+\$176K
Net 20-year cost	\$1.25M	\$1.98M	+\$730K

What this means

- 1 A later replacement. The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
- 2 Smaller repairs. Emergency repairs run about 4.2× the planned rate in a medical facility, and the PaxSeal fee covers half of planned repairs. Together that saves \$849K.
- 3 Patient care keeps running. A leak in a clinical area triggers infection-control work, closes rooms and can damage equipment.
- 4 The program pays for itself. Each \$1 of fees avoids about \$3.39 of other cash roof costs.
