What this means

- 1 A later replacement. The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
- 2 Smaller repairs. Emergency repairs run about 3.9× the planned rate in a school, and the PaxSeal fee covers half of planned repairs. Together that saves \$2.00M.
- 3 A predictable budget line. Emergency repairs become a fixed annual cost the board can plan for, and leaks stop closing classrooms.
- 4 The program pays for itself. Each \$1 of fees avoids about \$4.13 of other cash roof costs.

Local risk profile

Bexar County, TX (48029)

Hail and tornado

Baseball-size hail somewhere in Bexar County about once every 3 years (NOAA); April 2016 storm ≈ \$1.4B damage. Expected storm damage to this roof over 20 years is \$154K if maintained and \$231K with reactive repair only, before insurance. A documented maintenance history also helps when an insurer reviews a claim.
