Current roof value used	\$369K	\$369K	—
Roof life left at year 20	-\$307K	-\$82K	+\$225K
Net 20-year cost	\$1.53M	\$2.52M	+\$990K

What this means

- 1 **A later replacement.** The next new roof moves from year 8 to year 11, leaving 10 years of roof life at year 20 instead of 2.
- 2 **Smaller repairs.** Emergency repairs run about 4.2× the planned rate in a medical facility, and the PaxSeal fee covers half of planned repairs. Together that saves \$1.09M.
- 3 **Patient care keeps running.** A leak in a clinical area triggers infection-control work, closes rooms and can damage equipment.
- 4 **The program pays for itself.** Each \$1 of fees avoids about \$4.32 of other cash roof costs.
